SAP for Small and Midsize Businesses

SAP

Overview

Overview.

For small and midsize companies, growth is about doing more of what they do best. SAP cloud and on-premise solutions help them define that growth on their terms.

With SAP, every function and department can work together to connect processes from across the business, put resources in the right place and simplify how work gets done. Our solutions help growing businesses stay focused on both getting new customers and retaining the ones they have. And we can equip employees to make informed, in-the-moment decisions, so they can track business performance, out-maneuver competitors and keep the business moving forward.

With SAP, small and midsize businesses are ready for the challenges or opportunities they'll face throughout their digital transformation—because we're a partner they'll never outgrow, no matter where their business takes them.

Our Solution Areas.

Manage Your Business
Connect every person and process—from finance and expense reporting to procurement and inventory—into an integrated engine that can scale efficiently, control costs, manage compliance and help your team make the quick decisions required to run your business your way.

Engage Your Customers ▶
Focus the entire organization on creating meaningful customer experiences— giving employees the context they need to adapt each customer interaction to match what each customer needs.

Empower Your People ▶
Give employees, managers, and your entire HR department the tools to efficiently grow their teams and their own careers—so you can recruit and retain the workforce you need to take your business where you want it to go.

Anticipate Your Future ▶
Put decision-driving insights into the hands of your entire team—so they can see what's happening today, see how it impacts tomorrow, and take smart, in-the-moment actions to keep your business moving forward.
